

Supervising Teachers

The head of the department (HOD) plays a major supervisory role over the performance of the teachers delivering the course material. This supervision requires the ability to monitor teachers' activities in an effective and efficient manner.

- The HOD can see a list of the courses assigned to him/her and the teachers associated with these courses upon logging in.
- To access a teacher's course homepage, the HOD clicks on the teacher's name or image within the course block.
- The HOD can view the content added by the teacher, the assignments given to students and quizzes scheduled for the different classes in this course.
- The HOD can also access the classes taught by this teacher and view the performance of students in these classes, look at their grades or read behaviour notes recorded by the teachers.
