**An Overview on the Teacher's Interface
of Skolera LMS**

An Overview on the Teacher's Interface of Skolera LMS

•To begin, we would like to point out that Skolera is a complete learning platform, Unified Learning Platform, which provides a comprehensive and effective educational experience. Skolera provides modern technologies designed specifically to satisfy all the needs for the development of the educational process.

•Skolera, the Learning Platform, was designed to simplify the educational process for all users by helping educators manage all aspects of the educational process easily. It also helps students complete their assignments and school duties in an easy and familiar way. Skolera also helps parents follow up on their children's education directly. Skolera provides even more features!

If you haven't tried Skolera LMS (Learning Management System), you can now learn about the features and capabilities it provides.

[Try it now here.](#)

Note: You will notice that the title of the video is "An Overview on the Teacher's Interface of Skolera LMS" in the support section for teachers in the educational resources page.

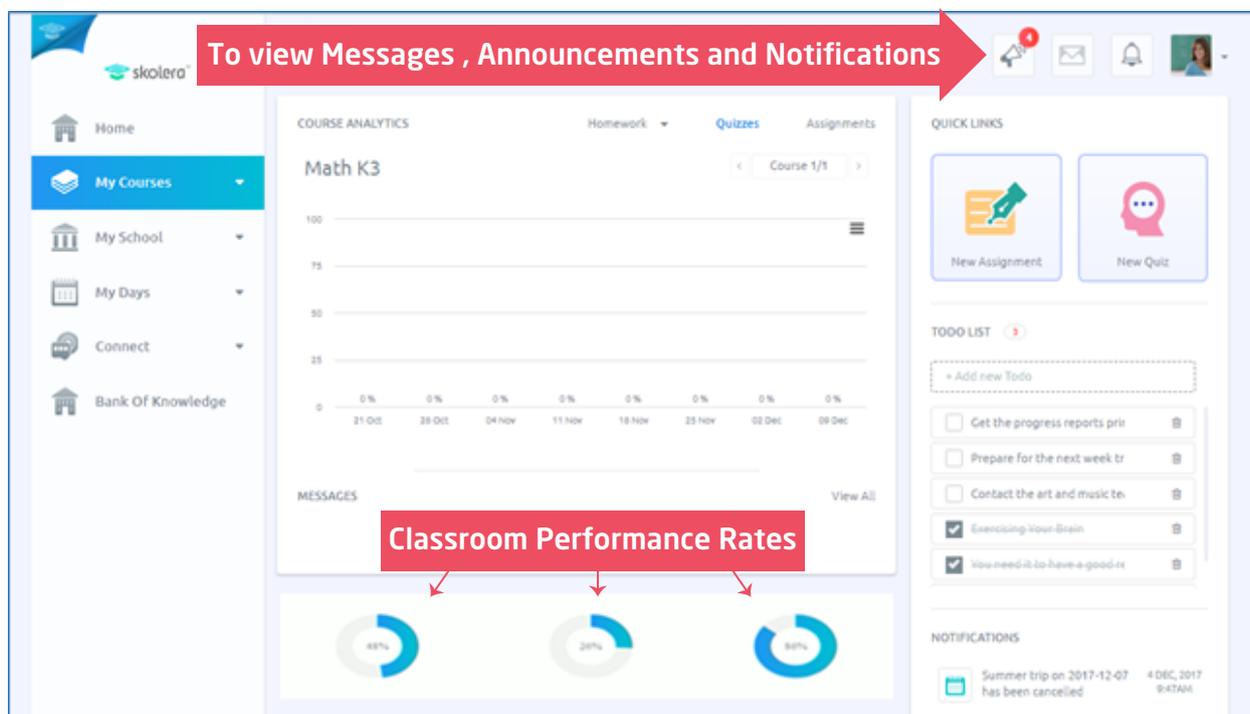

The interface of the Skolera Learning Platform was designed in a way that provides educators with all they need in a simple and easy way to enhance the educational process as follows:

The Homepage

•When the educator enters his/her account on Skolera, the interface will open up to the teacher's Homepage, through which he/she can gain an overview of the performance of all the lessons that were explained and completed, in addition to the assignments and exams that were assigned to students. All this is done in a quick statistical format.

•The homepage shows the percentage of assignments and exams that were complete, on assumption that they are the two main pillars on which student progress in the class is assessed.

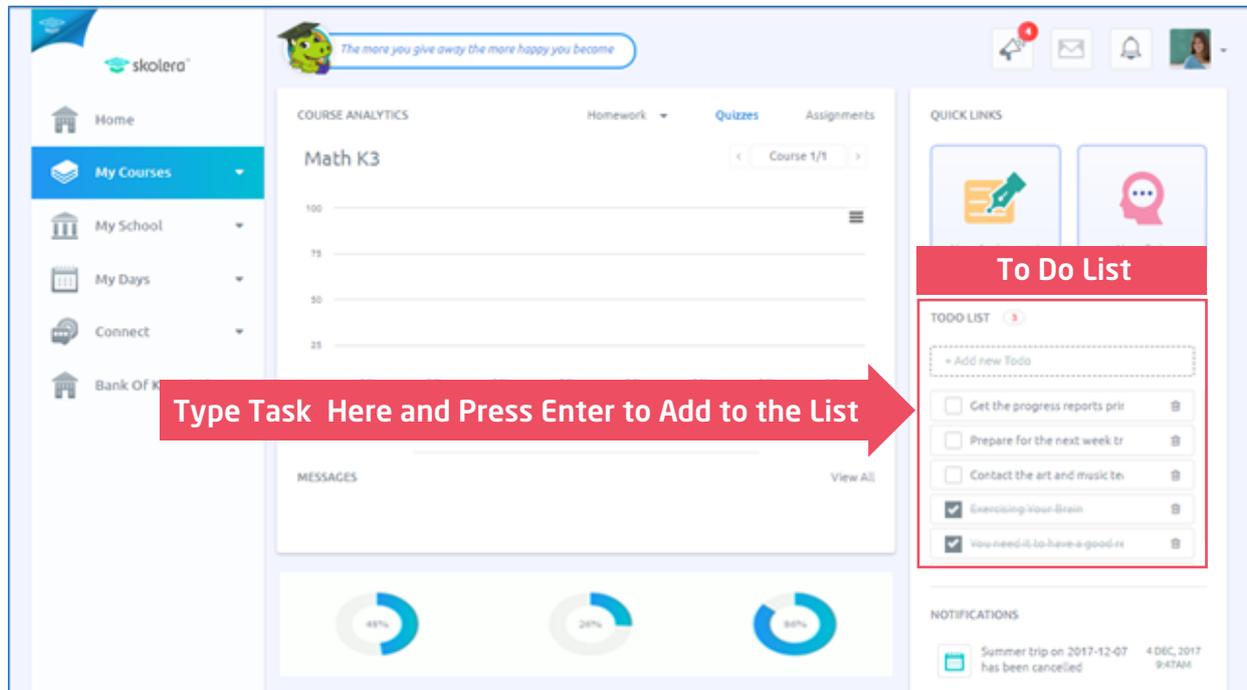

•The educator may also notice the notifications and announcements that the school administration posts for him/her, in addition to the messages he/she receives before opening them in the messages section.

To Do List

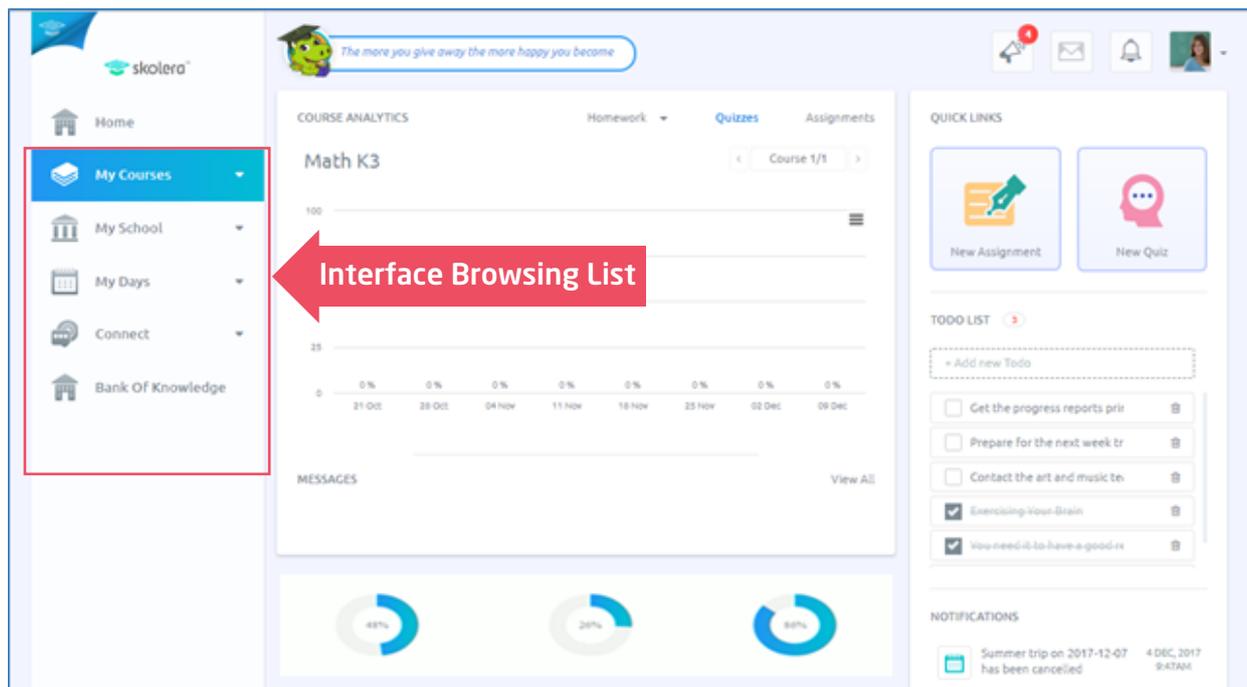

•To Do List can be found on the left side of the screen. It helps educators manage and order their tasks. It has been placed on the homepage to remind the educator once he/she enters.

•The educator can add tasks by writing a task's title in the "Add New Task" field, then press Enter on the keyboard.

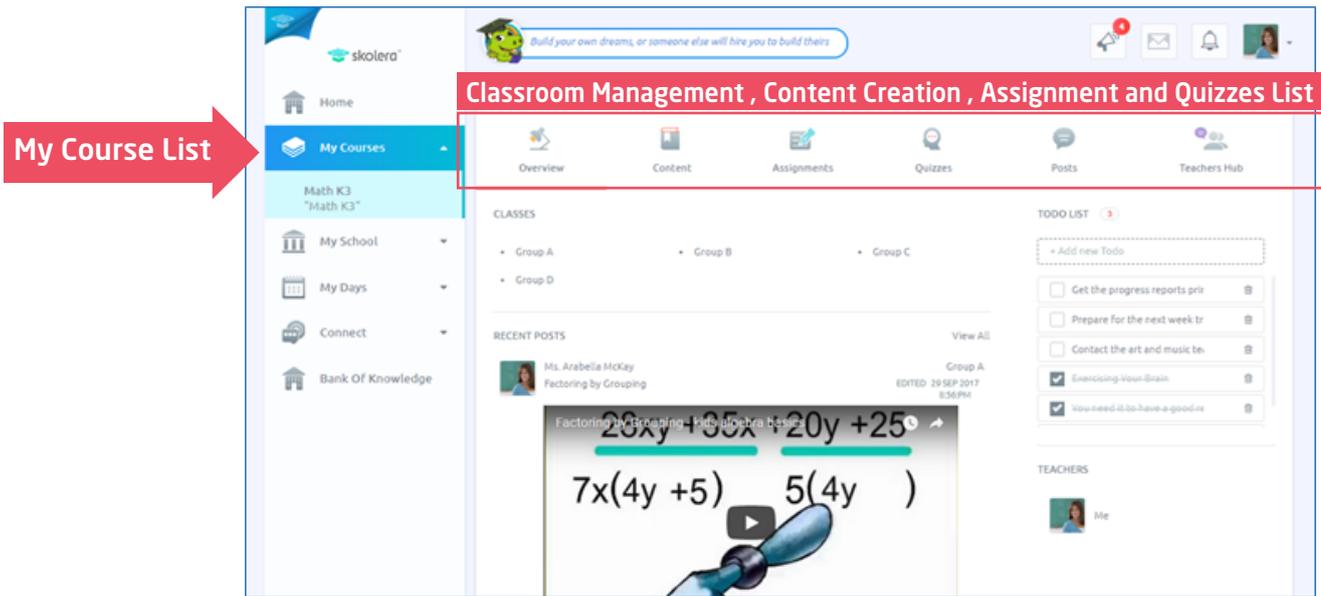

Navigation Menu

•The main menus can be reached easily via the Navigation Menu on the left side of the screen.

My Courses Menu

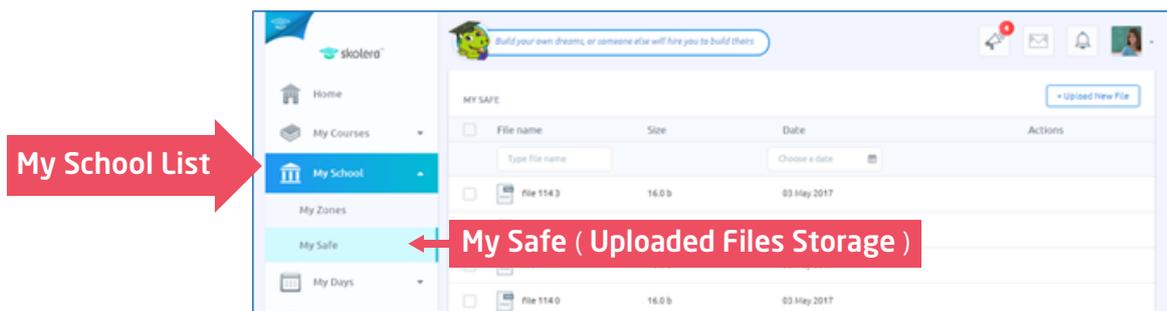

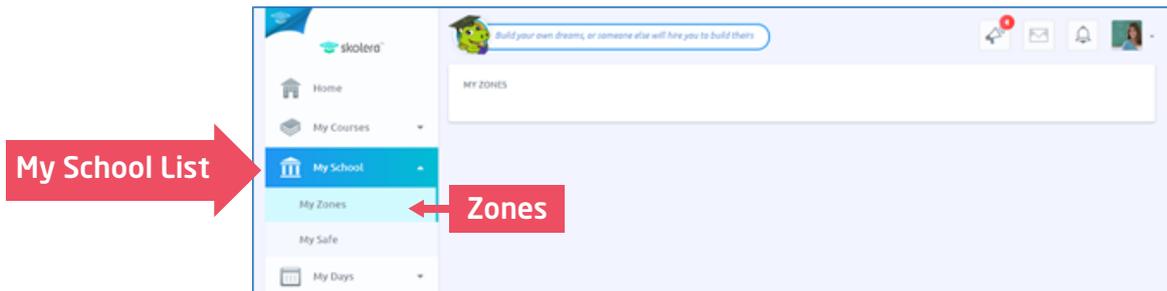

•The educator can manage his/her classes, the related educational content, and the assignments and exams through the My Courses menu.

My School Menu

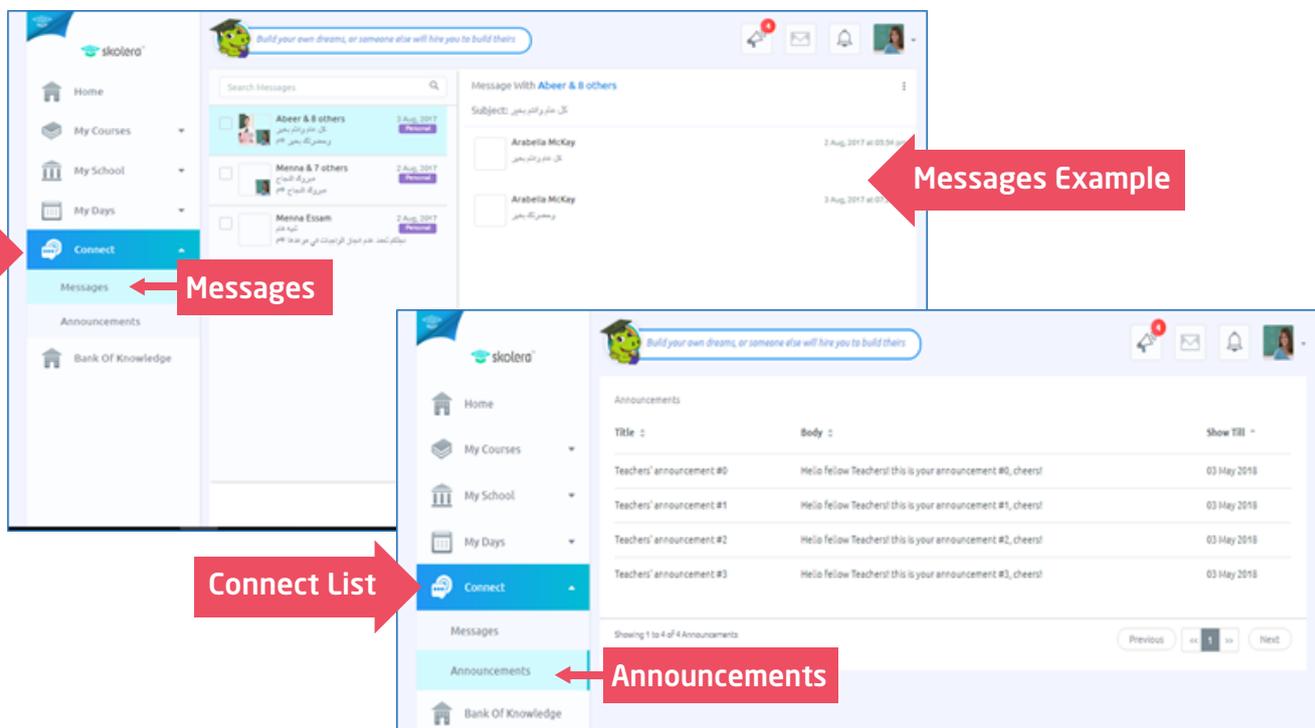

•The My School Menu contains My Zones, which acts as a venue through which teachers can take part in groups related to their extracurricular hobbies, interests, and activities. Teachers can also manage these zones themselves.

•Teachers can also access their files via the My School menu. Files uploaded to the My Safe cloud can be easily shared with students for their benefit.

Connect Menu

•The educator can reach his/her messages and school announcements via the Connect menu. These messages and announcements can be from colleagues or school management and can pertain to educational events, student performance, or a specific class.

•And so we have provided a quick glimpse on the teacher's interface. As we've seen, the interface provides teachers a general summary of what takes place in the class without getting deep into its details. It also allows him/her to see the performance of the classes, as well as the assignments and exams assigned to the students.

•We will soon proceed through the steps that will allow teachers to manage the educational content and explain how to create and assess assignments and exams for all the students in an efficient way.
