

**An Overview on the Parent's Interface
at Skolera LMS**

An Overview on the Parent's Interface at Skolera LMS

- Parents lacked the principles of proper supervision of their children in the traditional learning environment in the school. This compelled them to visit the school regularly and try to reach and communicate with all their children's teachers. This, of course, was usually practically impossible because some teachers would not be available during the parent's visit.
- When we designed the Skolera Learning Management, we took into account the element of parental supervision over student performance and considered it extremely important. We worked on making it easier and simpler for parents to follow up on their children's performance.
- We created a special interface for parents that allows them to follow up on their children's level of academic performance in a more detailed and simpler way at anytime and anywhere. This special interface also allows parents to connect with teachers directly whenever they have a question or concern regarding their children.

If you haven't tried Skolera LMS , you can now learn about the features and capabilities it offers by clicking here.

Note: You will find a video titled "An Overview on the parent's Interface of Skolera LMS" in the support section for parent in the educational resources page.

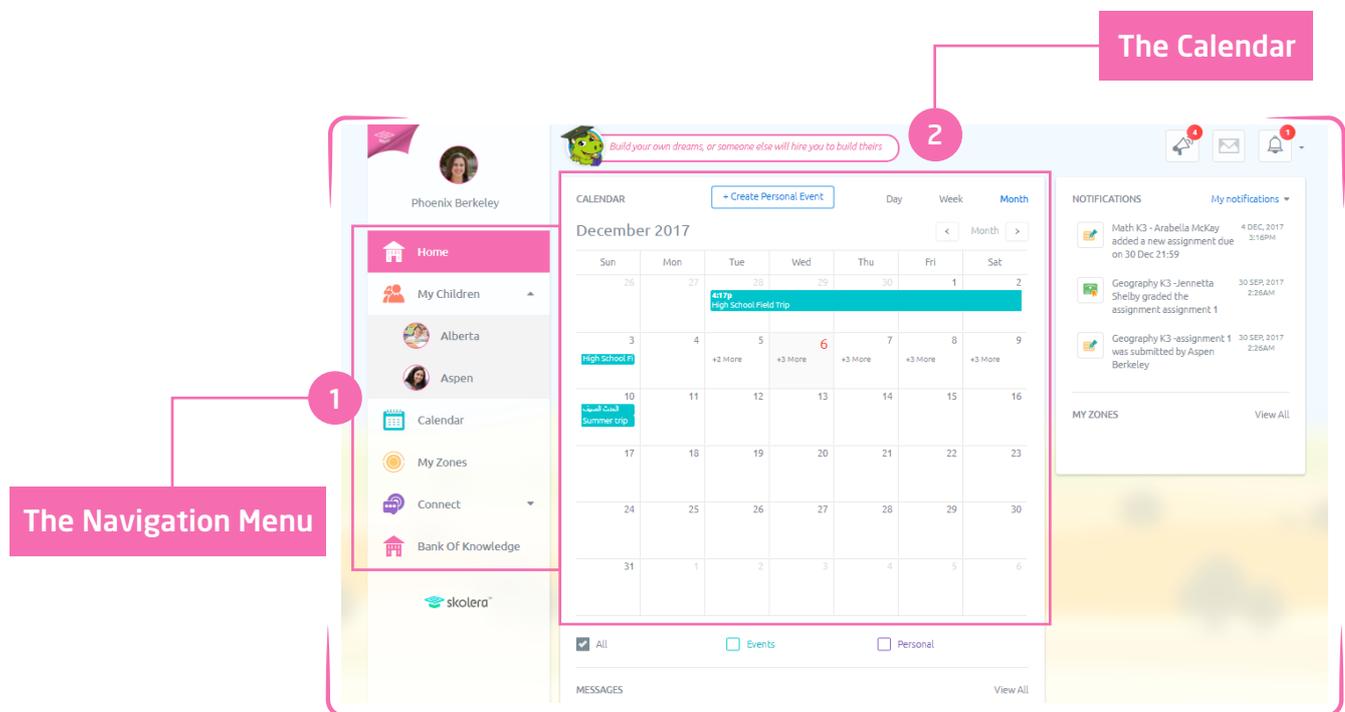

-The parents' interface in Skolera has been designed to provide them with everything they need to allow them to follow up on their children's performance simply and efficiently. Let us elaborate on how this design makes it all easier and simpler for parents:

The Homepage

-Once a parent opens up his/her account on Skolera, he/she is greeted with the interface's homepage, which provides him/her with some information that makes it easy to communicate with teachers effectively and gain a complete overview of the children's educational progress. The parent's homepage provides the following features:

- 1.The Navigation Menu
- 2.The Calendar
- 3.Messages
- 4.Notifications
- 5.My Zones

1. The Navigation Menu

- The Navigation Menu appears on the left side of the screen. It includes the homepage's logo, the My Children menu, the Calendar, My Zones, and the Connect menu.

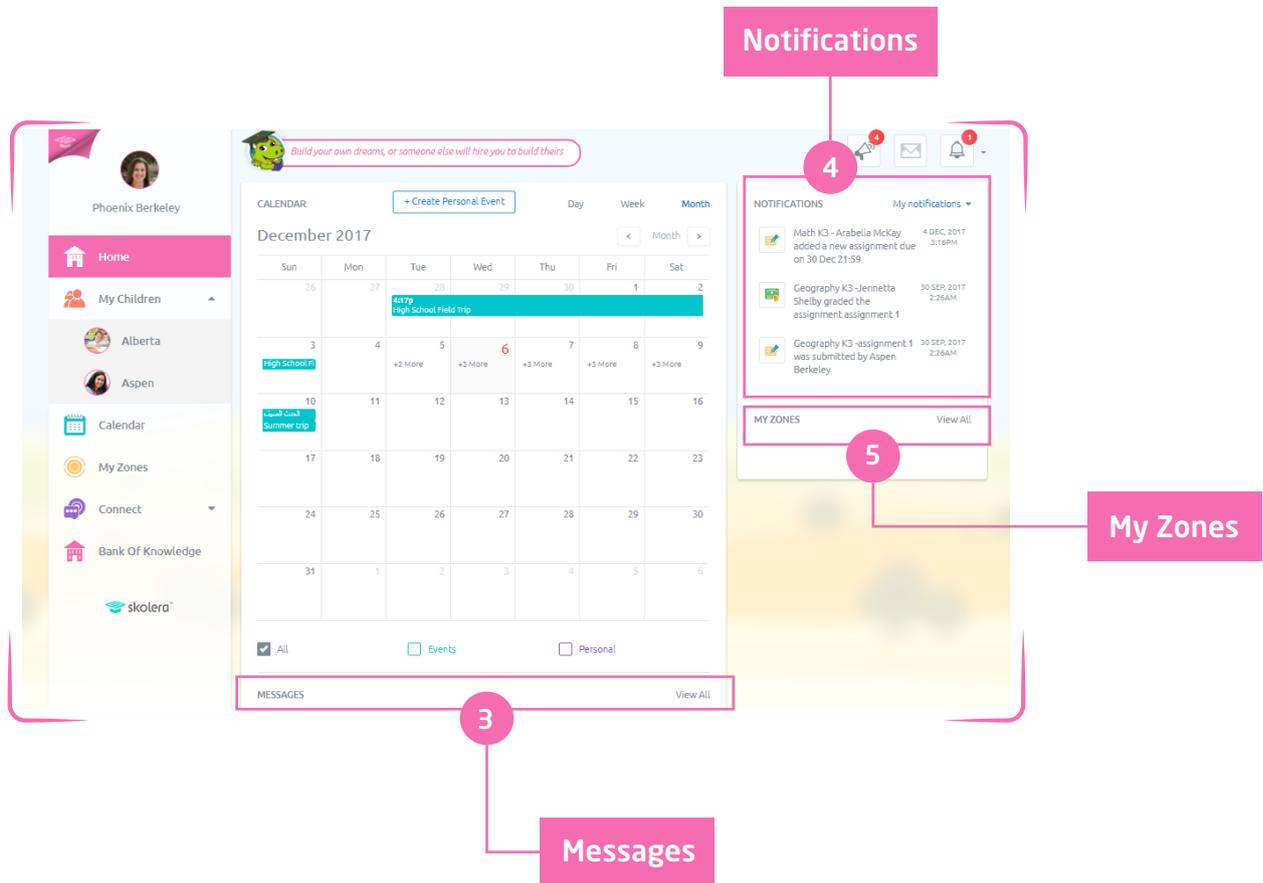

2. The Calendar

- The Calendar displays the monthly events parents would find relevant to them, in addition to school events students or parents would attend. Events can be displayed daily, weekly, or monthly to provide more flexibility to parents using Skolera.

- Parents can also create their own reminders for personal events to keep in mind when deciding whether to attend a school event or not.

3. Messages

- Parents can get a glimpse of the messages that have been sent to them from teachers or the school administration. These messages can be about school events and activities or about their children's performance.

4. Notifications

- Parents can see notifications that have been received from the school as well as those sent to their children to follow up on their performance and progress in class.

5. My Zones

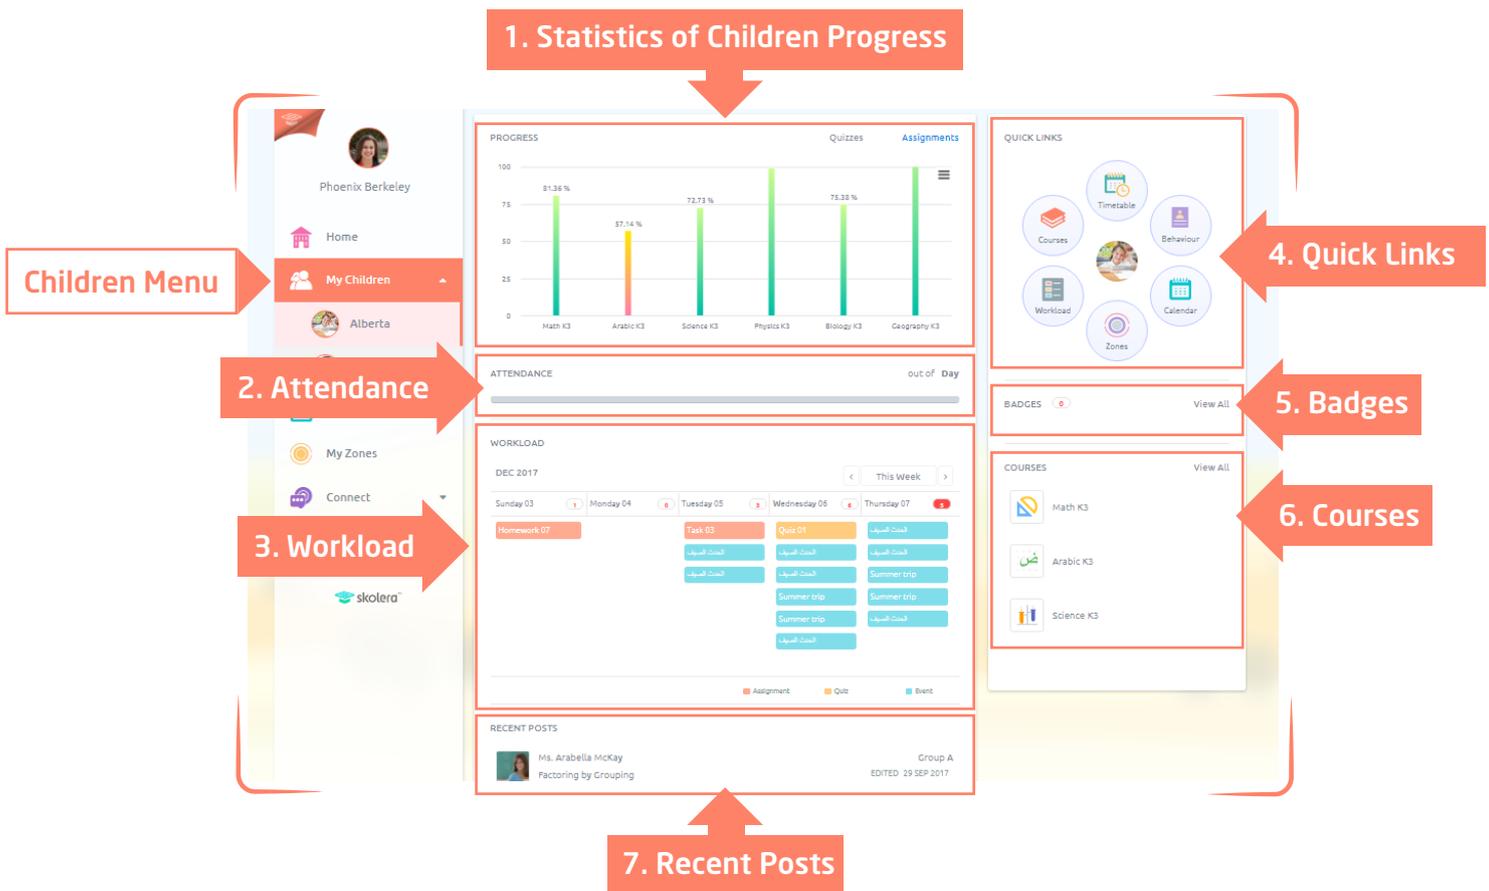

- My Zones is Skolera's virtual group section, providing parents with an opportunity to participate and contribute to activities, hobbies, and interests their children enjoy participating in at school.

My Children Menu

-Through this section, parents are given access to a window of their children's interface to gain a more detailed insight on their children's performance and progress.

My Children allows parents to view:

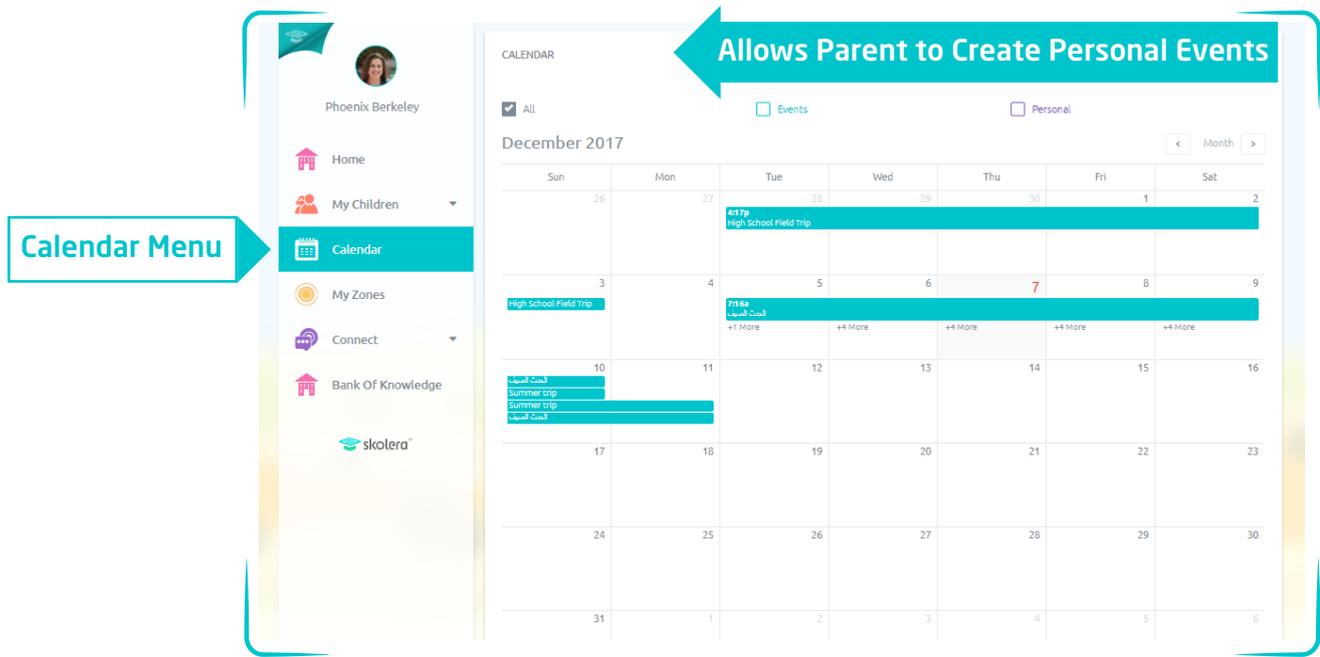

1. Statistics of their children's progress
2. Attendance
3. Workload List
4. Quick Links
 - Courses
 - Timetable
 - Behavior
 - Calendar
 - Zones
 - Workload
5. Badges
6. Courses
7. Recent Posts

The Calendar Menu

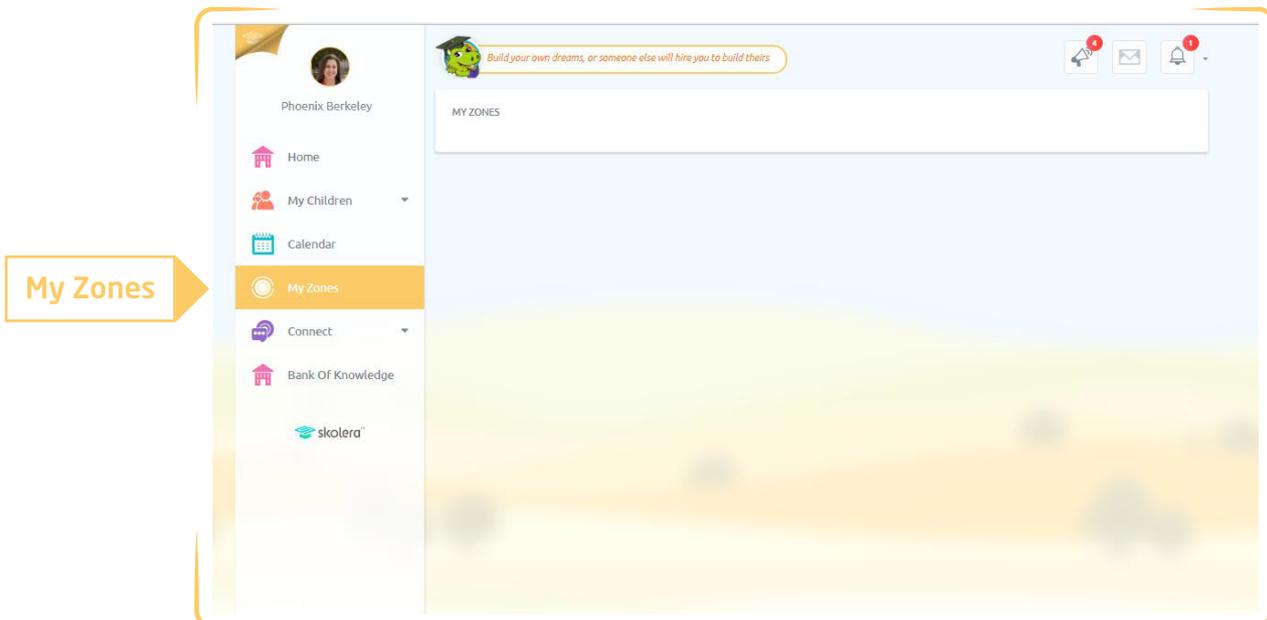

-Skolera's parent's interface features a calendar menu that displays all the personal and school-related events as a reminder for them. It also provides them with another way to keep up to date with their children's activities at school.

-Parents can also create their own personal events on the Skolera calendar to coordinate their important personal schedules with their children's school events.

My Zones

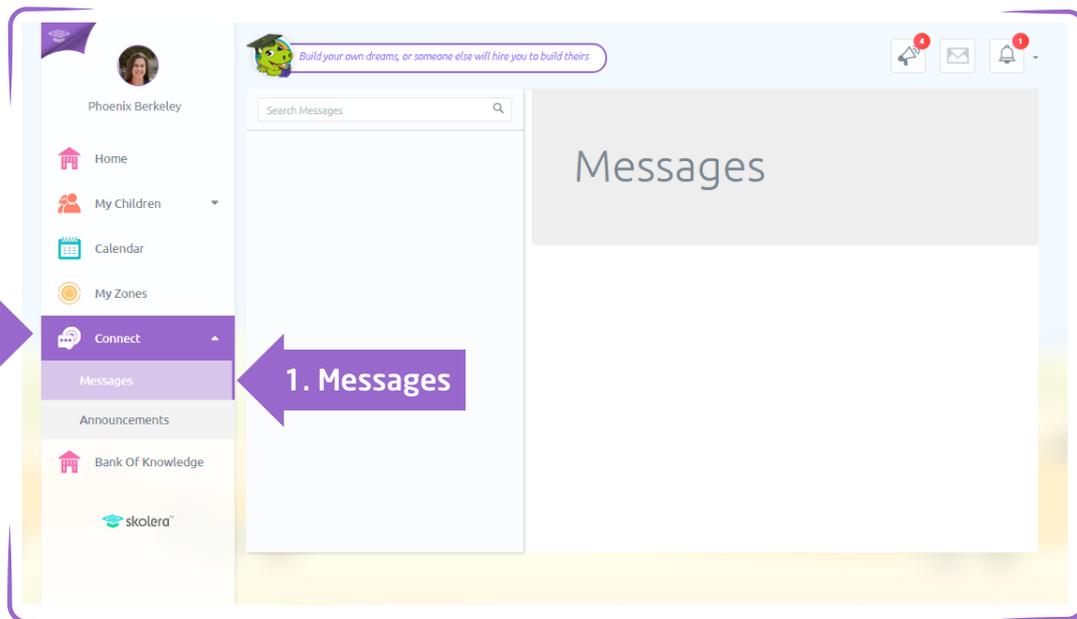

-My Zones features virtual school groups parents and their children can join, creating an environment in which students feel their parents care about them and their interests and hobbies, and take a keen interest in participating in them, too. This helps motivate students to develop and work even more to succeed and excel.

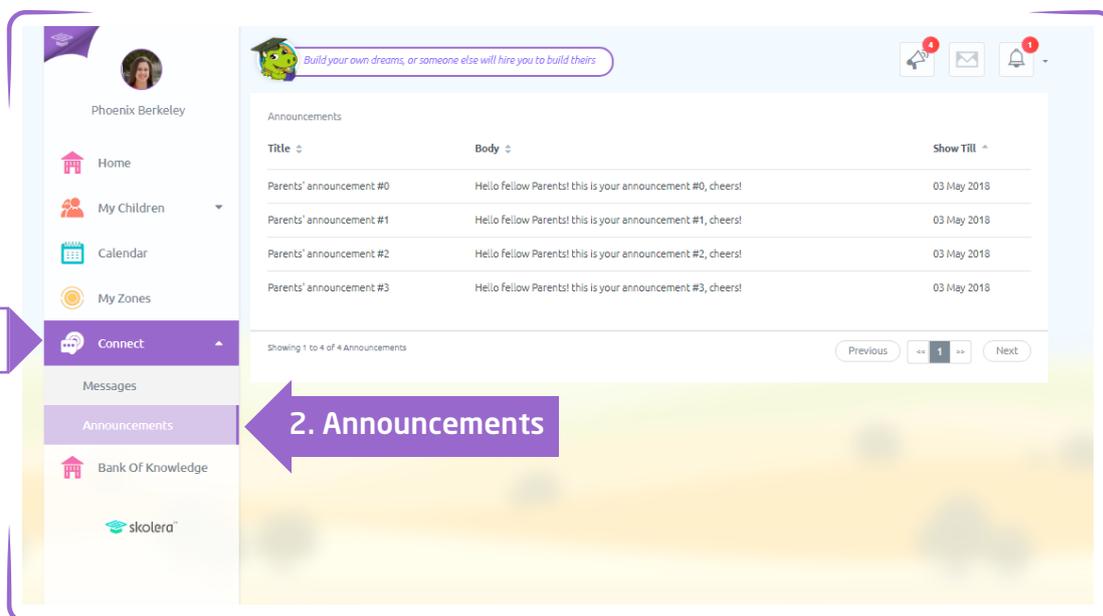

The Connect Menu

- Connecting with teachers and the school administration is important and crucial for parents to better supervise and follow up on their children's progress and performance. With that in mind, Skolera created the Connect menu. This allows parents to connect with teachers and the schools in one of two ways:

1.Messages: This section allows parents to read messages they receive from teachers regarding their children's performance and behavior in class, whether those messages pertain to positive or negative feedback.

2.Announcements: This section features dated and timed announcements and notifications from the school administration regarding activities, virtual groups, and events, some of which may involve the parent's children.

-We hope you gained a good idea of Skolera’s parent’s interface through this quick glimpse of its homepage menus, and we hope you understood how important parental participation in school is to us.

- The platform has been designed to enhance parents’ interaction and communication and save them time to improve their children’s education. We’ve made it easier for parents to gain a quick understanding of their children’s academic performance and class behavior, in addition to events and activities taking place at the school, all of which can be accessed anywhere and at anytime, eliminating the need for parents to be physically present at school.
